Education

- **École Nationale d'Arts et Métiers**
  M.Sc. Eng., Mechanical and Industrial Engineering *2017 – 2021*
- **Lycée Jean-Baptiste Say**
  Preparatory classes (PCSI/PSI), Physics, Math and Industrial Engineering* *2015 – 2017*

Experience

- **Harmattan AI** Paris, France
  Software Engineer *2025 – Present*
  - Spending most of my time working on our C2 software.
  - Maintainer of several tools used across R&D.
  - Defining and promoting software engineering best practices across the organization.
- **Withings** Paris, France
  Data Engineer, ML team *2021 – 2025*
  - Built tools and infrastructure to support algorithm development, certification, deployment and observability.
  - Built and maintained several collecting, labeling and monitoring tools for my team and the Clinical team.
  - Developed online and offline data collection tools, libraries, CI/CD tooling, internal dashboarding tools and package-hosting infrastructure.
  - Defined, promoted and implemented software engineering best practices across the team.
  - Got involved in several side projects creating interactive displays using Withings devices, for trade shows like CES or IFA.
- **Sysnav** Paris, France
  R&D Engineer intern *2021*
  - Worked on optimizing pedestrian navigation algorithms for the PLD (Personal Location Device) program, a precision indoor/outdoor positioning system.
  - Developed and implemented new algorithmic features for the product.
  - Built replay and analysis tooling (log parsing, algorithm replay, trajectory visualization and metrics computation) to support iterative optimization and decision-making.
  - Designed test plans and generated evaluation datasets.
  - Gained hands-on experience with BLE Beacons, UWB, and LoRa communication protocols.
- **Akonite** Paris, France
  Industrial Design intern *2018*
  - Preliminary industrial design project for an innovative fire safety enclosure.
  - Design work on bespoke pieces for luxury brands.
  - Redesign of components in Akonite's board sports range.
