I'm a Software Engineer who especially cares about developer experience, maintainability, software engineering practices, and finding clean and elegant solutions to tricky problems.

Education

- **École Nationale d'Arts et Métiers** — Paris, France
  M.Sc. Eng., Mechanical and Industrial Engineering — *2017 – 2021*
- **Lycée Jean-Baptiste Say** — Paris, France
  Preparatory classes (PCSI/PSI), Physics, Math and Industrial Engineering* — *2015 – 2017*

Experience

- **Harmattan AI** — Paris, France
  Software Engineer — *2025 – Present*
  - **C2 software**: architecture, core development, integration, deployment and infrastructure.
  - **Tooling**: maintainer of several tools used across R&D.
  - **Engineering**: defining and promoting software engineering best practices in the company.
- **Withings** — Paris, France
  Software Engineer, ML — *2021 – 2025*
  - **ML infrastructure**: tools for algorithm development, certification, deployment and observability.
  - **Data collection & labeling**: online/offline collecting, labeling and monitoring tools.
  - **Developer tooling**: libraries, CI/CD, dashboarding framework, package hosting.
  - **Engineering**: defined and implemented best practices across the team.
  - **Side projects**: immersive experiences for events like CES [1] [2].
- **Sysnav** — Paris, France
  R&D Engineer intern — *2021*
  - **Navigation algorithms**: beacon-based position correction (BLE/UWB) for an indoor/outdoor pedestrian location device.
  - **Analysis tooling**: replay, log parsing, trajectory visualization.
  - **Testing**: test plans and evaluation datasets.
  - **Technologies**: BLE/UWB/LoRa, Python.
- **JAD Technology** — Paris, France
  Co-Founder – UHF RFID traceability solutions for Industry 4.0 and IoT — *2019 – 2020*
  - **Smart cabinet**: production tool storage for Groupe Renault, from proof of concept to industrialization.
  - **Traceability platform**: real-time asset tracking web application, and an end-to-end solution for a luxury meal delivery service (inventory, tracking and order verification).
  - **Technologies**: RFID UHF (RAIN, MIFARE, ...), Raspberry Pi.
- **Akonite** — Paris, France
  Industrial Design intern — *2018*
  - **Luxury pieces**: bespoke design work.
  - **Fire safety enclosure**: preliminary industrial design.
  - **Board sports**: component redesign.

Skills

- **Programming languages**: Python, TypeScript, SQL, Rust, Bash.
- **Technologies**: Docker, Terraform, GitHub Actions, Ansible, Next.js, Electron, FastAPI, Turborepo.
- **Others**: CAD modeling, 3D printing, PCB design, sewing, silversmithing, metalworking.
